Dear Jann,

I am pleased to provide the SkyJuice Foundation with this letter of recommendation for its charitable activities in Asia.

As Chairman of the NSW-Asia Business Council and Deputy Chairman of the NSW Parliament Asia Pacific Friendship Group, we supported SkyJuice's activities in Indonesia following the natural disasters in Jakarta and Yogyakarta. Funds raised at the Asia Business Dinner enabled the dispatch of two SkyHydrant water filtration units to Indonesia.

The SkyJuice Foundation recognises that access to potable water in disadvantaged communities in developing nations is essential in the control of infectious diseases, particularly during natural disasters. The SkyHydrant technology provides an innovative, yet simple and highly effective solution to this end, and is of significant assistance and immense value to those communities on a continuing basis.

The collaborative project between the NSW Parliament Asia Pacific Friendship Group and the NSW-Asia Business Council demonstrated the benefits of supporting this cost-effective Australian technology to provide an essential service to communities throughout the world.

I congratulate the SkyJuice Foundation for its dedication in helping communities lacking safe and clean water throughout the world. The efforts of the Foundation and its volunteers provide an affordable and sustainable solution to a fundamental human need. I wish the SkyJuice Foundation the very best with its future endeavours.

Yours sincerely,
