

Australia Help Provide Portable Water Purification

for Cawang Community, East Jakarta

From left: Larry from Sky Juice Foundation, Purnama, Ariana, Marmita from SD Indonesia, David from Sky Juice Foundation and Welly Salim from ABAC

During the Austrade Mission in Jakarta, the New South Wales Asia Business Advisory Council (ABAC) and SkyJuice Foundation from Australia had donated portable water filtration unit about USD 3,500. Welly Salim from ABAC had given the donation through Jakarta Government to Susila Dharma Indonesia (SDI) in Park Lane Hotel on Tuesday, September 18, 2007 .

This Skyhydrant machine of water purification unit is intended for affordable community water supply for production of clean water. It operates without the need for an electrical power supply. SkyHidrant Water Filter

SkyHydrant™ Water Filter with retractable legs is lightweight, robust and can produce 10,000 litres of low cost portable water per day by removing bacteria, turbidity and other contaminants.

with rectable legs is lightweight, robust and can produce 10,000 litres of low cost potable water per day by removing bacteria, turbidity and other contaminants. The Solar SKY Station unit in tsunami affected region of Indonesia

provides clean drinking water to a school and local community from a polluted water well. This solar powered unit can produce 10,000 litres of low cost clean water drinking water per day.

SDI had made some survey in many ares of Jakarta to find the location before decided to installed the machine in Jalan Arus, Cawang, Kramat Jati, East Jakarta. This

The Solar SkyStation unit in tsunami affected region of Indonesia provides clean drinking water to a school and local community from a polluted water well. This solar powered unit can produce over 10,000 litres of low cost clean water drinking water per day.

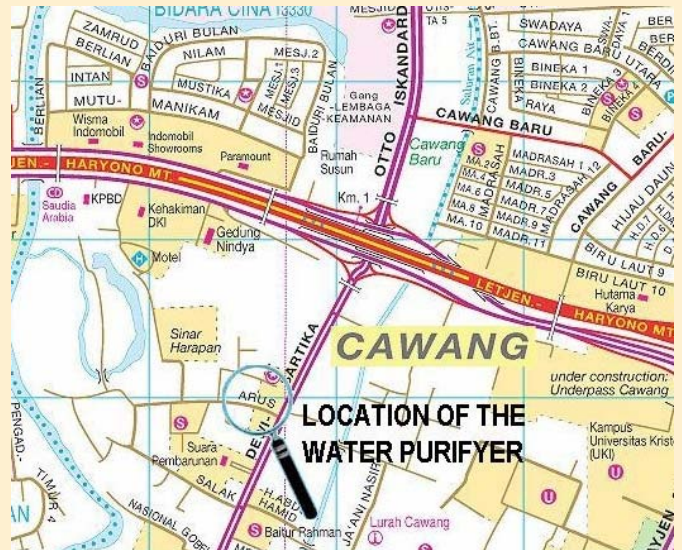

before, there is no clean water in this location

location was chosen because it is fulfil the SkyJuice requirements such as required a space 3 metres x 3 metres for the tanks and tanks stand, no water saline, ideal for schools, health clinics, hospitals and community water supply.

SDI asked Budiyanto Subagya, chairman of local community, to assisted and coordinate SDI with the local people. SkyJuice team and the local people got together to prepare the infrastructures and trained the local people how to operate this machine.

Hand over of this machine was done in Thursday, September 20, 2007. David Hughes and John Murray as the representative of SkyJuice Foundation given the Portable Water Filtration Unit to the local community witnessed by SDI team. SDI is sincerely thank you to SkyJuice Foundation for this valuable donation, which are very needed in this community.

SkyHydrant installation in Cawang

Clean water is very needed in this Cawang community

SkyJuice Foundation is not for profit registered charitable organisation which assist, provide, consult and supply potable water solutions to developing communities, countries and donor organisations. Since January 2005, they had supplied over 300 water filtration units, including East Timor, India, Indonesia, Kenya, Nepal, Oman, Sri Lanka, Pakistan and Thailand. In Indonesia, they had donated in Aceh after tsunami in 2004. They would donate Gunung Kidul, Wonosari, Sleman, and Klaten.
