### **Re: Recommendation of SkyJuice Foundation**

Dear Sir,

Susila Dharma (SD) Indonesia had the pleasant opportunity to work with SkyJuice Foundation for the last three years in providing potable water filtration units to developing communities in Indonesia. Since September 2007, SkyJuice and SD Indonesia have worked together to deploy SkyHydrant water purification units in East Jakarta and West Sumatera.

Our last collaboration was on West Sumatera earthquake, September 2009. SD Indonesia visited the earthquake site and found some areas which needed clean water. Then we contacted SkyJuice Foundation, who was willing to donate three SkyHydrants in the earthquake affected area; those are Agam, Pariaman and Padang.

The SkyHydrants are user friendly. In addition during the installation, SkyJuice Foundation provided and brought the SkyHydrants, technicians and taught the local communities how to operate and maintain the equipment. In one of the SkyJuice monitoring and evaluation site visits in Jakarta, the local community expressed their sincere thanks and was happy to receive SkyHydrant which they have maintained and operated since 2007.

SD Indonesia finds SkyJuice's activities in Indonesia have helped many people to provide clean water filtration units especially in developing communities or during emergency relief.

Sincerely yours,

**Susila Dharma Indonesia**
