

## CAPABILITY STATEMENT

“**R**hett, I have just actually come in from the field where I spent more time with the SkyJuice setup and performed backwashing and maintenance.

I found it easier to operate and maintain than I thought from reading the original manual.

We have had no issue at all with the SkyJuice and it is continuing to pump out potable water that about 30+ people use daily at our site.

I have no hesitation at all in recommending the product and it has been absolutely fantastic for our setup and the use by our large staff of both Aussies and Nationals and the surrounding houses in

the village area.....”
