TO WHOM IT MAY CONCERN

As a representative of the Foundation of Goodness located in Seenigama, Sri Lanka I am pleased to recommend the following parties, Crown Project Services and SkyJuice Foundation in collaboration with CleanUp Australia and Solco as they have installed and commissioned "SkyStation"- comprising a solar-powered pump and SkyHydrant culminating in a Sustainable Water Treatment System for the Seenigama Village Lahiru Centre.

The project was totally funded by the above mentioned organization demonstrating a high degree of commitment and quality. Since the installation the project has proved to be very beneficial for the area and all the residents of Seenigama as they now have a reliable source of clean water.

Sincerely,

Nicholas Kreider

Foundation of Goodness
